github.com/hirodinn

Summary

Full-stack engineer (TypeScript, Node.js, React/Next.js, Python) with production experience building and deploying recruitment and ERP systems. Contributed a C++ (Drogon) performance layer to Mereb's Applicant Tracking System and run its infrastructure on Hetzner with Docker. BSc Software Engineering student at Addis Ababa University.

Professional Experience

Full Stack Engineer 03/2026 – Present | Addis Ababa, Ethiopia
Mereb Technologies
- Built the resume-parsing layer and admin portal of Mereb's Applicant Tracking System across ats-api, ats-client, and resume-parser, using Next.js, FastAPI, PostgreSQL, and Typesense.
- Re-implemented the candidate-assessment challenge request path in C++ with Drogon in front of the Node.js backend, cutting median (p50) latency from **5ms to 250µs**.
- Moved resume parsing onto Bull queues so uploads no longer block API requests.
- Deploy and maintain production on Hetzner with Docker Compose, PM2, and Cloudflare Tunnel.

OpenPSI Engineer 01/2026 – 03/2026 | Addis Ababa, Ethiopia
iCog Labs
- Developed cognitive schemas for OpenPsi, OpenCog's goal-driven decision-making module, in MeTTa, working inside a large existing codebase.
- Extended the sub-goal generation planner to optimize pattern matching in metagraph rewriting, reducing execution timeouts, and added integration tests using MeTTa's native unit testing framework.

Junior Full Stack Engineer 09/2025 – 12/2025 | Addis Ababa, Ethiopia
Solanova Tech Solutions PLC
- Built the nodelala.et property rental platform with the MERN stack, including responsive user dashboards, property search, and push notifications, connecting React to Express REST APIs.
- Developed interactive shared workspaces for yenext.org , a team collaboration platform, with React, NestJS, and PostgreSQL, including authentication and real-time updates via WebSockets.

Education

BSc in Software Engineering 09/2024 – Present | Addis Ababa, Ethiopia
Addis Ababa University
GPA: 3.9
Relevant coursework: Data Structures and Algorithms, Operating Systems, Databases, Computer Networks

Software Engineering Training Program
A2SV
- Intensive training in algorithms, data structures, and complexity analysis.

Technical Skills

- Languages: TypeScript, JavaScript, Python, C++, SQL
- Backend: Node.js, NestJS, Express, FastAPI, PostgreSQL, MongoDB, Typesense, REST, Bull queues
- Frontend: React, Next.js, Redux, Tailwind CSS
- DevOps: Docker, Docker Compose, PM2, Cloudflare Tunnel, Hetzner, Linux, Git

Projects

LEAN - Healthcare ERP | Mereb client project
- Contributed to the accounting module of an ERP for healthcare product imports and trading, and supported its containerized deployment on Hetzner.
