Summary

Software engineer with experience developing production applications, backend services, and performance-sensitive systems. Proficient in C++, Python, and TypeScript, with practical experience in system integration, data processing, and production deployment.

Professional Experience

Mid-Level Full Stack Engineer 01/2026 – Present | Addis Ababa, Ethiopia
Mereb Technologies
- Engineer and maintain production applications across architecture, implementation, and deployment.
- Improve backend performance, system reliability, and development infrastructure.

OpenPSI Engineer 09/2025 – 03/2026 | Addis Ababa, Ethiopia
iCog Labs
- Contributed to OpenPsi, an OpenCog cognitive architecture for goal-driven decision-making.
- Supported the development of cognitive reasoning and intelligent agent behavior.

Junior Full Stack Engineer 09/2025 – 01/2026 | Addis Ababa, Ethiopia
Solanova Tech Solutions PLC
- Delivered full-stack features across web applications for property rental and team collaboration.
- Integrated frontend interfaces with backend services and data persistence layers.

Education

BSc in Software Engineering 09/2024 – Present | Addis Ababa, Ethiopia
Addis Ababa University
GPA: 3.9
Relevant coursework: Data Structures and Algorithms, Operating Systems, Databases, Computer Networks

Software Engineering Training Program
A2SV
- Intensive training in data structures, algorithms, and problem-solving.
- Practice implementing algorithmic solutions and analyzing time and space complexity.

Technical Skills

- Languages: TypeScript, JavaScript, Python, C++, Java, SQL
- Backend: Node.js, Express, NestJS, REST, Bull queues, microservices
- Frontend: React, Next.js, SSR, Redux, Tailwind CSS
- DevOps: Docker, Docker Compose, PM2, Cloudflare Tunnel, Linux, Git, Hetzner
- CS fundamentals: data structures, algorithms, system design.

Projects

Talent - Recruitment & Verification Platform
• Developed Mereb's recruitment and talent verification platform, including an administrative portal for managing recruitment operations.
• Optimized backend request handling using C++ and Drogon; deployed and maintained production infrastructure on Hetzner.

LEAN - Healthcare ERP
• Contributed to a full-scale ERP system for LEAN Healthcare Solutions to manage healthcare product imports and trading operations.
• Supported application deployment and containerized infrastructure hosted on Hetzner.

Nodelala - Property Rental Platform
• Developed a full-stack property rental platform using the MERN stack.
• Implemented rental workflows, state management, and persistent data integration.
